REN4001 1-pt. RENEW hardener

RENEW Hardener

What's it all about?

- Faster dry time
- Enhances gloss, durability, and chemical resistance
- Used by professional painters
- Automotive quality product line

FOR PROFESSIONAL OR INDUSTRIAL USE ONLY

Add RENEW hardener to John Deere paints using 8:1 paint to hardener ratio. Thin the paint according to John Deere label directions. Allow mixture to set for 20 – 30 minutes before using. Mix again thoroughly before application. DO NOT mix more than will be used within an eight-hour period. DO NOT use paint that has started to thicken. High temperature will reduce pot life of the paint.

RENEW Hardener is also available in Low-VOC formulation.
